

Maximise  
recharge rates

Allocate print and  
scan activity to  
clients or matters

Secure printing  
throughout the  
firm

*The reference solution in cost recovery and  
billable expenses management*

- Higher realisation of revenues from billable expenses.
- Printing waste and overall cost reduction.
- Improved print management and streamlining of document workflow.
- Improved transparency and accuracy therefore better relations with the client
- Proven return on investment in less than six months.

## Make your MFP fleet a revenue generator, not a cost center

- Accurately track all billable prints, copies, scans and allocate them automatically to a client.
- Take a step further and connect the solution to your accounting system to automate the invoicing
- Remain transparent in your invoicing strategy: you can justify each page you actually invoice then improve your customer relationship.
- Allocate different pricing to different devices or different types of print (color, black & white...)

**Proven Return On Investment in less than six months**

## Secure your printing

The Secure Print feature holds the print works until the user is authenticated on the MFP. This enables:

- Print work being only taken by its rightful owner
- Securing the sensitive information
- Meeting strict privacy requirement policies
- Reducing uncollected paper

## Centralised control and management

Copittrak offers administrators a convenient and easy to use web interface which allow them to:

- Generate global or detailed reports on MFPs activities, on users or on clients / cases
- Set up rules and pricing strategies
- Manage users and rights

## An open system for a seamless integration in the firm's existing processes

Copittrak already communicates with most legal accounting solutions, streamlining the complete print workflow, from the launch of the job to its invoicing. Additionally both the external terminal and the embedded version of the solution are compatible with most printing devices.

## Other functions in the Copittrak solution

- Copittrak Scan: automatically routes jobs, tracks, manages and assigns cost associated with scanned paper documents platform independent, works with all copier/MFP manufacturers
- Copittrak Editor: transaction editing, cost allocation and approvals through worldwide access to the Copittrak System software database
- Copittrak Print Room: fully automates tracking and job management in your copy center
- Copittrak Phone: effortless tracking and costing of telephone usage
