ThreadPrint

Reduce printing costs significantly

Increase your 'Green' credentials

Save time and stay efficient

Eliminate the cost and waste associated with email printing

"Everyone can benefit using ThreadPrint, saving £ thousands per year in paper, toner and recycling costs!"

"The excess use and waste of paper is a common issue. Users pointed out the printing of emails, especially those with long discussion threads, to be an area of great waste.
ThreadPrint has a small Outlook plug-in footprint, installs easily and works well in the Citrix environment. It provides the intuitive, user friendly solution the firm was looking for".

Tim Hyman, IT Director EMEA, Reed Smith LLP
(a Global Law Firm with 3,000 employees)

• Proven reduction of e-mail printing by up to 50% (e-mails can constitute between 15-40% of a firm's print volumes);

• Eliminates the 80% waste from e-mail printing;

• Easy to use and install, no end-user training required;

• Integrates with your IT environment (Outlook, DMS...) and doesn't change the printing environment (unlike other solutions);

Stop waste and save money

Email is still the communication media of choice. There are many reasons why emails need to be printed, but it is often unnecessary to print whole conversations. However just to print the required sections is time consuming, can cause unnecessary paper waste and increases print costs.

ThreadPrint™ provides an easy way to select and print specific threads from an email conversation and solves the problem.

It includes a number of single shortcuts to increase user efficiency, such as printing the latest thread. Users also have the option to print attachments at the same time.

Key features

- Preview and print all or individual threads of an email;
- Print email threads and attachments at the same time and to your preferred printer;
- Print multiple emails with a single-click using the Quick Print feature;
- Supports nested attachments;
- Option to print 2 pages per sheet to save paper or 4 pages if duplexed;
- Easy to use and install and doesn't change printing environment (unlike other solutions);

Integrates with your IT environment

ThreadPrint™ is fully compatible with HP Worksite and works in conjunction with Copitrak Print.

Supporting latest Microsoft Outlook releases

ThreadPrint™ fully supports Microsoft Outlook *2003, 2007, 2010 and 2013*. Thanks to a low impact Outlook plugin, users can configure the 'Quick Print' button to always print the last thread, last two threads or number of previous threads all from the click of a button.

"It is not unusual for users to print 5 to 50 pages from an e-mail thread only to throw 80% into the bin. The direct cost to both the business and the environment is enormous."

The Document Production Experts

Novaplex are a leading document production and template management consultancy, servicing law firms, property firms and many other document-centric businesses.
