TESSIAN

INBOUND EMAIL SECURITY IN FINANCIAL SERVICES

An Essential Layer of Inbound Email Security For Financial Services

Tessian Defender is a comprehensive inbound email security solution that automatically prevents a wide range of attacks that bypass O365 and Secure Email Gateways (SEGs)

TRUSTED BY GLOBAL-LEADING FINANCIAL INSTITUTIONS

Evercore · BDO · Prudential · affirm · Schroders · GoCardless · JTC

INBOUND THREATS ARE TOP OF MIND FOR SECURITY LEADERS IN FINANCIAL SERVICES:

43%
of breaches in the last year involved phishing.
VERIZON

96%
of phishing attacks arrive via email.
VERIZON

12.5BN
Spear phishing has cost global businesses $12.5bn in losses.
FBI

+2,000%
BEC incidents have increased by nearly 2,000% since 2018.
VERIZON

While businesses across industries are vulnerable, financial institutions are especially lucrative targets. They handle an incredible amount of sensitive information and high-value payments on behalf of customers and clients.

WHY FINANCIAL INSTITUTIONS CHOOSE TESSIAN OVER OTHER SOLUTIONS:

Automatic Threat Prevention

Tessian Defender keeps critical financial data and funds safe by **automatically** detecting and preventing Business Email Compromise (BEC), Account Takeover (ATO), spear phishing, and impersonation attacks on **both desktop and mobile**. These advanced email attacks slip past SEGs, Microsoft 365, and G Suite and could result in financial loss, lost client trust, and a damaged reputation.
Is Your O365 Email Secure? →

Education and Awareness

When Tessian Defender detects potentially malicious emails, warning messages written in plain English offer context and explain exactly why the email was flagged. This helps reinforce security awareness training and helps improve employees' security reflexes over time, without impeding on productivity.

Reduced Admin Overhead

Tessian Defender seamlessly integrates with existing email security controls and removes the burden on IT and security teams. Repetitive and time-consuming tasks are automated and human verification isn't required. No more maintaining complex sets of rules, establishing pre-defined policies/configurations, or manually investigating potential threats.

WHAT OUR CUSTOMERS ARE SAYING:

EVERCORE

2000 EMPLOYEES

"Our biggest risk is our users. Just us as humans. Our incilcaton is to do things as fast as we possibly can. But when we do things quickly, it's generally at the expense of security. Automated solutions like Tessian allow us to enable our teams to work efficiently, while still making sure we've put up guardrails to keep them safe."

Elsa Ferreira
CHIEF INFORMATION SECURITY OFFICER
EVERCORE

"Tessian prompts the right behavior without being too restrictive. That's hugely valuable and is especially important for us because we really do treat our peoples' time as a precious commodity."

Rob Hyde
CHIEF INFORMATION SECURITY OFFICER
SCHRODERS

Schroders

5500 EMPLOYEES

ICE

6000 EMPLOYEES

"I love working with Tessian because they get UX. User experience is king in security. When you see their dashboard metrics focused on how rarely they pester users, you know they have the right mindset."

Jerry Perullo
CHIEF INFORMATION SECURITY OFFICER
ICE | NEW YORK STOCK EXCHANGE

"We didn't come to Tessian for inbound protection. Just outbound. But when we saw how effective Tessian Defender was – especially at reinforcing training – we quickly realized how valuable it would be to have one single platform that covered both inbound and outbound. If we can solve two problems together, why do just one? That was a deciding factor for us"

Punit Rajpara
HEAD OF IT
GOCARDLESS

GOCARDLESS

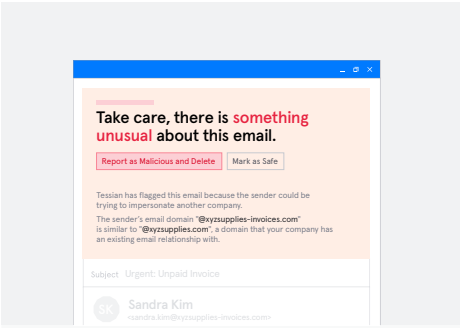
650 EMPLOYEES

JTC

1100 EMPLOYEES

"By installing Tessian, we have avoided potential breaches and the financial impact of a breach on our business. The investment has shown a clear ROI, and JTC see Tessian as a core technology partner who will continue to add value to the business as we both grow."

Adam Jeffries
CHIEF INFORMATION OFFICER
JTC



Comprehensive Coverage

The most advanced threats bypass legacy solutions, leaving people as the last line of defense. But people are stressed and distracted, and bad actors carefully craft emails to dupe targets. Tessian automatically prevents internal and external impersonation, including

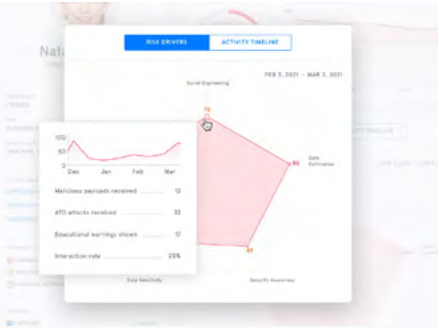
Bulk Remediation

Tessian Defender automatically quarantines emails determined to be highly malicious and allows admins to bulk-remediate malicious emails in 1 click. Delete suspicious emails in users' inboxes directly from the portal and thwart burst attacks by deleting entire campaigns from users' inboxes.



Unique Risk Insights

Security teams can view top threats, top target users, and a detailed breakdown of anomalous events detected by Tessian Defender. And, with granular visibility of employee behavior, you can quantify risks, compare trends, and benchmark your security posture against other organizations in financial services.

TESSIAN | Human Layer Security

TESSIAN.COM

Tessian's mission is to secure the human layer. Using machine learning technology, Tessian automatically stops data breaches and security threats caused by human error - like data exfiltration, accidental data loss, business email compromise and phishing attacks - with minimal disruption to employees' workflow. As a result, employees are empowered to do their best work, without security getting in their way. Founded in 2013, Tessian is backed by renowned investors like Sequoia, Accel, March Capital, and Balderton and has offices in San Francisco and London.
